PROFESSIONAL SUMMARY

Results-driven web developer / fullstack engineer with 3+ years of experience building scalable, high-performance web applications across fintech, e-commerce, and ed-tech sectors. Proficient across the full development stack — from crafting pixel-perfect, accessible frontends with React, Next.js, and Angular, to designing robust REST APIs with Node.js and Express. Known for clean code practices, strong cross-functional collaboration, and a consistent record of delivering responsive, user-focused products on time with minimal to no bugs.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, React.js, Next.js, Vue.js, Nuxt.js, Angular, Tailwind CSS

Backend: Node.js, Express.js, Nest.js, Java, Spring Boot

Databases & ORMs: PostgreSQL, MongoDB, Mongoose, Prisma ORM, TypeORM

State Management: Redux Toolkit, Zustand, React Query, SWR, RTK Query, RxJS

Tools & Practices: Git, Firebase, Agile/Scrum

PROFESSIONAL EXPERIENCE

Union Systems Limited | Software Engineer I

July 2025 – Present · Lagos, Nigeria (Full Time)

- Building and maintaining scalable full-stack applications using Angular on the frontend and Java/Spring Boot on the backend.
- Designed component-driven UIs that meet WCAG accessibility standards and ensure cross-browser compatibility.
- Implemented lazy loading and optimized change detection strategies, reducing page load times and improving overall application performance.
- Translated wireframes and design prototypes into functional, high-performance interfaces in close collaboration with UI/UX designers.
- Integrated RESTful APIs using Angular's HttpClient and RxJS observables for robust, reactive data handling.

Product Studio HQ | Product Engineer

September 2025 – June 2026 · Lagos, Nigeria (Contract)

- Built and maintained scalable frontend applications using React and Next.js, delivering responsive, maintainable, and high-performance user experiences.
- Built 15+ reusable, component-driven UI components aligned with WCAG accessibility standards and optimized for cross-browser compatibility.
- Leveraged lazy loading and Next.js server components to optimize rendering and resource loading, improving overall application performance by 30%.
- Translated Figma designs, wireframes, and prototypes into responsive, production-ready interfaces while collaborating closely with UI/UX designers.
- Integrated RESTful APIs using Redux Toolkit Query (RTK Query) for efficient data fetching, caching, synchronization, and state management.

Prizeet | Frontend Engineer

December 2024 – July 2025 · Lagos, Nigeria (Contract)

- Engineered the Admin Dashboard, Seller Platform, and Buyer Platform using React.js and TypeScript, all of which are now live and serving active users.
- Integrated Firebase for real-time data management on the Seller Platform, improving data sync reliability.
- Optimized application performance by up to 15% through lazy loading, code-splitting, and memoization, resulting in faster load times and a smoother user experience.
- Participated actively in code reviews, enforcing best practices around clean, maintainable, and well-documented code.

Coffer | Frontend Engineer

January 2025 – June 2025 · Lagos, Nigeria (Full Time)

- Developed and maintained the Admin Dashboard with Next.js, TypeScript, and Tailwind CSS, prioritizing performance, accessibility, and UX consistency.
- Architected reusable component systems, improving development speed by up to 10% and ensuring UI consistency across features.
- Optimized API consumption and state management flows, measurably improving application responsiveness.
- Collaborated closely with backend engineers and designers in an Agile environment, contributing to sprint planning, code reviews, and technical discussions.

Ed3Hub | Frontend Developer

November 2024 – March 2025 · Lagos, Nigeria (Contract)

- Built and maintained responsive web applications using Next.js and Tailwind CSS, focused on performance and cross-device consistency.
- Integrated RESTful APIs with RTK Query to handle dynamic data fetching and caching efficiently.
- Worked alongside designers and backend engineers to deliver features aligned with product requirements.

Dev HQ | Fullstack Engineer

March 2024 – February 2025 · Enugu, Nigeria (Full Time)

- Architected and shipped high-performance web applications using Next.js 14 and TypeScript, managing complex application state with Redux Toolkit.
- Designed and implemented RESTful API endpoints in Node.js and Express for authentication and full CRUD operations, incorporating secure data handling best practices.
- Built user authentication and role-based authorization systems, significantly improving application security posture.

Barleyfield | Frontend Developer

October 2022 – September 2023 · Lagos, Nigeria (Full Time)

- Delivered a full website revamp using HTML, CSS, JavaScript, and jQuery, modernizing the company's online presence and improving user experience.
- Followed strict design and coding guidelines to ensure visual consistency and maintainability across all pages.

PROJECTS

The Chair Shop | Fullstack E-Commerce Application

- Built a chair e-commerce storefront with Next.js 14 (App Router), React, and TypeScript, featuring a Sanity-powered product catalog with search and pagination.
- Implemented a persistent cart using Zustand and localStorage, alongside email/password authentication backed by a separate NestJS REST API.
- Improved performance by resolving image URLs server-side and defaulting to React Server Components, reducing First Load JS from 227 kB to 170 kB.

- Enhanced UX with Framer Motion animations, Lottie illustrations, and Lenis smooth scrolling.

[Netflix Clone | Fullstack Streaming Application](#)

- Built a full-featured Netflix clone with Next.js 14, TypeScript, and Tailwind CSS, integrating the TMDB API for movie browsing, trending, and top-rated listings.
- Implemented authentication with NextAuth supporting email/password plus Google and GitHub OAuth, backed by Prisma and MongoDB.
- Added personalized favorites, debounced real-time search, and automated movie-release notifications via CRON jobs.
- Used SWR for cached, revalidating data fetching and shadcn/ui with Radix primitives for an accessible, responsive interface.

EDUCATION

Bachelor of Science in Geology — *University of Lagos (UNILAG)* | 2024
